

MUL-T-LOCK®

An ASSA ABLLOY Group company

ART OF LOCKING

Mul-T-Lock is a worldwide leader in developing, manufacturing and marketing High Security products and has built an international reputation based on unique design, quality products and excellent customer service.

Mul-T-Lock products are available in the following various platforms:

MT5+

Mul-T-Lock MT5+ patented state-of-the-art High Security cylinder platform, featuring an advanced security concept that combines 3 powerful locking mechanisms: patented Alpha Spring located at the tip of the key and locking bar mechanism, a magnetic key duplication card, and a computerized key cutting machine – KC5.

INTERACTIVE

Mul-T-Lock's patented High Security Interactive platform raises the user's level of security to new heights thanks to several features:

A spring-loaded pin placed inside the cylinder plug, which produces a "virtual

combination" when the key with the floating pin is inserted. Mul-T-Lock's unique telescopic pin tumbler mechanism, with internal and external pins. Key security is ensured by the patented key and key blank, together with a coded Mul-T-Lock key card supplied in every Interactive package. Drill-resistant steel inserts High pick and bumping resistance.

7X7

7X7 is Mul-T-Lock's standard platform, providing an excellent level of basic security and exceptional value for money. It features: A pin tumbler mechanism with 7 chambers. A reversible nickel silver key with a plastic head. The 7X7 platform may be keyed alike or master keyed. Key security is ensured by a coded Mul-T-Lock key card supplied in every package.

SECURITY DOORS FIRE RESISTANT DOORS

MUL-T-LOCK® LOCKING SYSTEMS

KEYED ALIKE

One key opens many doors without any limitations.

MASTER SYSTEM

The master system is produced according to the client's requirements and wishes. It can be designed on several authorization levels.

TWO-SIDED KEY

In this system every apartment owner has the key in which one side opens the owner's apartment and the others side opens common doors. This solution is very suitable for big apartment buildings.

CONSTRUCTION KEY

Special solution for construction companies. The workers use the construction key, which opens all doors, in the process of building. When the construction is finished, the change-key is used for a recombination of the cylinder. The use of a new set of five keys becomes possible. Available only in the Interactive platform.

START WELL, END WELL

Since 1993 Kolnoa stands for high technology and precision, dedication for every detail, workmanship and a big heart

YOUR WISHES ARE OUR CHALLENGE.

with our tailor-made door you can reach your unique personal style without compromising your security. Allow yourself to be inspired...

WE CARE FOR EVERY DETAIL.

MUL-T-LOCK LOCK AND CYLINDER
insure high security and durability; extremely quiet lock operation

DOOR OPENING LIMITING DEVICE
is attached to the frame and operated from the inside of the door by knob; brings additional security.

ADJUSTABLE HINGES
allow the door to be adjusted, making the installation easier and more precise.

OPTIONALLY FRAME AND WALL COVER

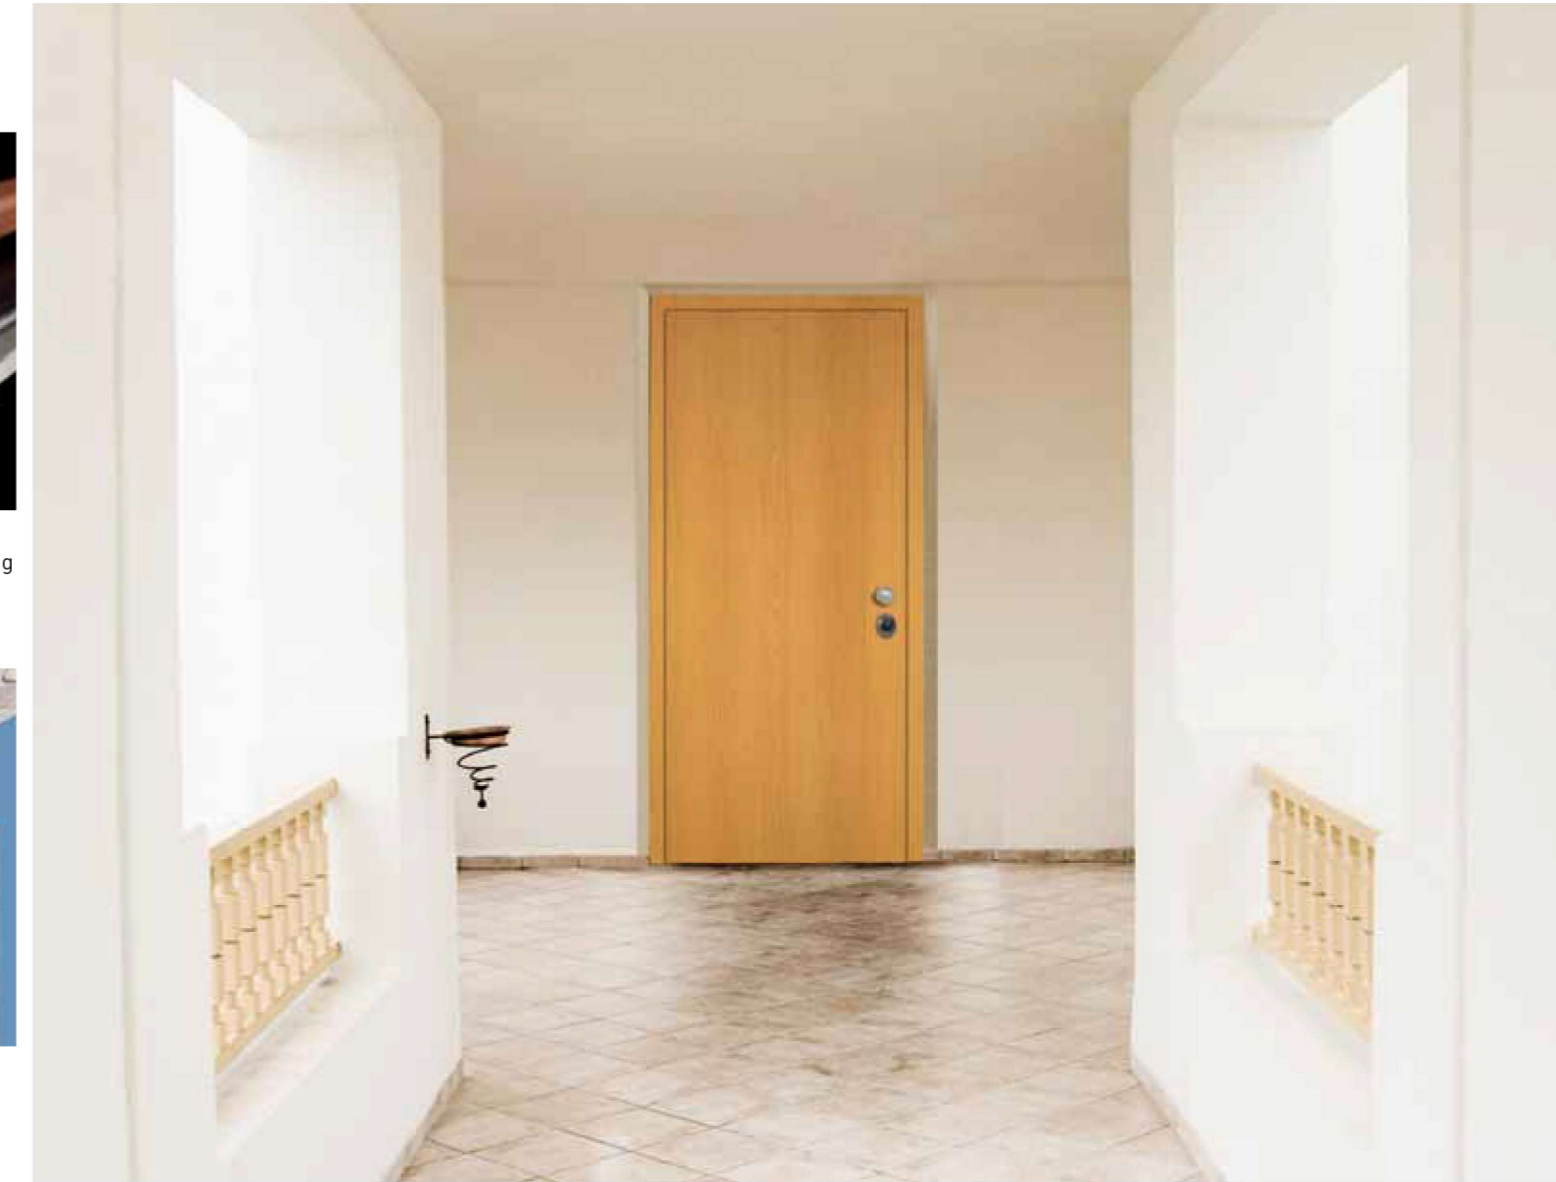

SPECIALLY DESIGNED FRAME, PVC coated, very high anti-burglar resistance, technical solution prevents door blocking in case of earthquakes.

INTERNAL INSULATION, insulating and sound absorbing panels are inserted inside the door structure

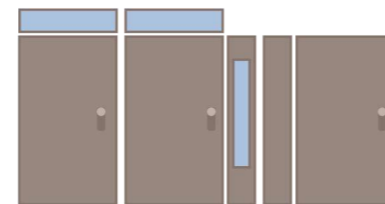

MOBILE SEAL, positioned on underside of the door, fitting flush with the floor and ensuring a seal against draughts, light and sound.

MATERIALS, COLORS AND OTHER DETAILS CAN BE COMBINED ACCORDING TO YOUR WISHES, BUT FOR SECURITY THERE IS ONLY MUL-T-LOCK

YOU DREAM KOLNOA
MAKES IT REAL.
